

PTO Program:

After completing the academy, officers begin a lengthy 17-week training program. In this program, the officer will be assigned to several PTO instructors. While training with these instructors, the new officers will be taught all aspects of patrol duty through hands on experience and problem based learning exercises. The new officers will generally work all four patrol shifts during their time in the program. At the completion of this program, new officers will be assigned to one of four patrol shifts.
